Brewster Will Build — In anticipation of his coming marriage with Miss Winnifred Weddick, Douglas

## Society

**MALA'S MOONLIGHT DANCE**

At beautiful Mala, the soft silvery light shed by a radiant moon, the guests from all Maui of the Lahaina Outdoor Circle enjoyed one of the most pleasing and novel dances of the year on Saturday night.

Shortly after the start of the dance, artificial lighting was ordered extinguished by Mrs. Arthur Collins, lending an indescribable beauty and charm to the dancing floor.

Well attended by Central and East Maui folk there was however a noticeable lack of attendance by the members of the Outdoor Circle under whose auspices and for the benefit of which the event was planned. It is thought probable that the entertainment offered at Kahului attracted many of the West Maui people.

A large canvas square stretched over the concrete flooring of the wharf made a very pleasing dancing surface and the music was furnished by the Lahaina orchestra.

**HONORS MISS TODD**

Mr. and Mrs. Arthur Collins were hosts Saturday evening at a farewell dinner tendered Miss Janet Todd who had been in the employ of the Pioneer Mill for some time past and who is to sail shortly for her home in Scotland. Close to a score of intimate friends and acquaintances were present to wish Miss Todd the aloha of the islands and to express the desire that she return to Maui where her departure will be much regretted.

F. S. WADSWORTH, Secretary.

## Beggars in Germany Form Trades Union

**BERLIN May 11** — (Associated Press Mail)—Although public mendicancy is forbidden by law, the streets of Berlin are full of beggars who, especially after dusk, importune passersby with harrowing tales, some of which may be true.

Mutilated war victims, who exhibit genuine scars on the sidewalk, are always sure of public charity, but many others of the fraternity resort to more or less transparent tricks to excite compassion. They have established a "trade union" in a northern suburb where, according to reports, about 150 learners are being trained in the art of begging, including "making up."

The theoretical part of this course alone takes 6 weeks, and is followed by a practical course at race meetings and at doors of churches, theaters and cafes.

The city is divided into districts by the "union" which places a certain number of certified pupils in charge changes shifts weekly, and collects and distributes the proceeds.

Every day, it is stated, an average west-end district brings in about 3,000 marks. Certain favorite sections command premiums up to 500 marks per day.

These professional beggars are keen judges of human nature. Wealthy Russians are said to be their best patrons. Americans, on the other hand, are an everlasting puzzle to them. Sometimes, they say, Americans are extremely generous and hand out five, ten or twenty mark bills with princely liberality, but others refuse to give anything.

## Philippine Mills Are Gaining Efficiency In Sugar Making

**MANILA, P. I., May 10**—(Associated Press Mail)—Efficiency of the sugar centrals in the Philippine Islands is approaching the Hawaiian standard, according to records in the offices of the Philippine Sugar Central agency on the six centrals controlled by the Philippine National Bank in the Island of Negros.

E. W. Kopke, supervising chemist of the agency who has returned to Manila from a four months stay in Negros, where the bank's centrals are located said:

"The average number of tons of cane per ton of sugar at the bank's six centrals is 8.53, compared with the average of 8.61 for Hawaii in 1921. The average factory efficiency for five of these centrals for the season is 91.8. This is a very favorable record when all the conditions are considered. Our milling results are somewhat below those in Hawaii, but the boilinghouse recovery compares favorably with results in Hawaii. The degree of exhaustion of final molasses is 38.5 for Hawaii and our mills are on a par with this record."

"There is less ash in Philippine cane juices and sugar than there is in those of Hawaii, which gives our sugar better refining characteristics. Hawaiian cane averages eighteen percent more fiber per ton of cane than our cane, but practically all our centrals have been able to get along without additional fuel."

The planters are cooperating with us heartily in every way which is especially important in its bearing on future production and increased production per acre under cultivation. Twenty five experimental fields are now under the supervision of the bureau of science where problems of fertilizing etc., are being solved."

## Leprosy Treatment is Given Much Publicity

**MANILA, P. I., Apr. 30**—(Associated Press Mail)—The treatment of leprosy in the Philippine Islands at the colony on Cullion Island is receiving wide publicity, according to Dr. Victor G. Heiser, far eastern representative of the Rockefeller Foundation, who has just returned to Manila from a visit to the leper settlement in company with Governor General Wood.

Dr. Heiser, upon his return here found awaiting him letters from health authorities in many parts of the world, asking for information about the treatment of leprosy here. From Norway Dr. Heiser received a letter inquiring what new developments are being made here in the matter of control of the disease. The communication says the health authorities are having good success in the Norwegian hospitals with the ethyl ester treatment and that thirty eight percent of the patients have been cured with that treatment.

From the India health department Dr. Heiser received a letter asking for details of the method of treatment of the disease.

Siam also is anxious for information on the establishment of leper colonies and the methods used for segregating leprosy patients similar to those used in Cullion. Siam, the communication says, has no leper hospital or colony for lepers but hopes to utilize information obtained from the Philippines in the establishment of hospitals.

## BEAUTIFUL CHINESE GOODS

The most remarkable assortment that we have ever received. It includes lovely tea sets, odd and dainty folding tea tables, trays, fans and other charming novelties that have all the savor of the Orient. We shall not try to describe them to you but invite you to call and see them and they're worth a special trip to see.
